T. L. HARPER, CLERK. BY W. H. WARNOCK, DEPUTY.

Patience is the word for the Oklahoma immigrants to consider.

6 00 THEY GET THERE ALL THE SAME.

No President Has Ever Been Notified of His Election.

Washington, D. D., March 12 .-A gentleman of an inquiring turn of mind, having had his curiosity aroused by first attendance upon an inaugural sought Senator Edmonds for information.

"Who notified Gen. Harrison that be had been elected President of the United States?" he asked.

"Nobody. The law makes no provisions for such notification. The President-elect takes cognizance of the fact by general report, the same as the Supreme Court Justices, and" continued the Vermont Senator "in a hundred years there has never been a case of failure on the part of the right man to learn of his election in time to be present on inauguration

Miniers in Arms.

Los Angeles, Cal., March 13.-Great excitement existed in the Lower California gold mining camps last night and thousands of desperate gold hunters are breathing vengeance against the international company of English capitalists, whose agents lay claims to the mines and are trying to shut out Americans and others. Yesterday it became known that the company had sent to San Francisco for 5,000 Chinamen to work the mines, and last night American and Mexican miners held a mass meeting and determined not to submit to the coming of the coolies. They also framed a petition to the American congress, asking for protection. The situation looks threatening and a battle between the independent miners and the English company's men is looked for every moment. Blood will certainly be shed if the company insists on bringing coolies to the camp.

A Discouraging Report.

San Francisco, Cal., March 12 .-A newspaper man just returned from Tinjuna, Lower California, asserts, and his opinion is backed by experienceed mining men, that the Ensenada mining boom is a first class "fake" and composed of a series of exaggerations. Only about \$10,-000 in gold has been taken out by the Mexicans and half that amount was secured by old miners. Prospects for quartz ledges are fair, but it will take lots of capital to work them and the flocking gold hunters will be in luck if they don't go hungry ere they return to California. The San Diego authorities are keeping unfavorable reports to themselves and are greatly to blame.

A Monopoly's Tight Grip.

There are more that 30,000 miners out of work in the anthartic coal regions, and their families are on the

verge of starvation. These men are anxious to work and are not particular about the scale af wages, but the companies refuse to employ them because they have already got out more coal than they have been able to sell and have a larger accumulation than at any time for many years.

Under the operation of the natu ral laws of trade this state of things would result in a reduction in the price of coal, which would stimulate consumption, set the miners at work and put bread into the mouths of their children. But there is a conspiracy on the

part of a few rich men to veto the natural laws of trade in this matter, so that they may enrich themselves still more enormously by starving the miners and their families and levying a heavy tax upon the consumers of coal. The conspiritors own the whole supply of anthracit coal and control the transportation lines by which it is brought to market. They have "cornered" one of nature's gifts to man, and by virtue of railroad and other franchses freely granted to them by the people they are wronging and oppressing the people.

Goldsmith was supposed to be one of the most correct formulators of general principles for correct conduct. He certainly was not in error when he said: "Ceremonies are different in every country, but true pcliteness is everywhere the same."
